

# FDA Grade Thermally Conductive Epoxy Adhesive, Two Part Compound Technical Product Bulletin

## **PRODUCT DESCRIPTION:**

AA-BOND FDA26 is a thermally conductive Versatile adhesive guaranteed a high strength bond.

AA-BOND FDA26 is two part adhesive used and cured at room temperature for bonding, repair applications by manufacturers of food preparation, processing and packaging equipment and devices.

## **GENERAL PROPERTIES:**

Appearance	Gray	
Cure Type	Heat cure or Room Temperature	
Benefits	<ul> <li>Excellent durability.</li> <li>High shear and peel strength</li> <li>Heat and impact resistant</li> <li>Handy duo-pack cartridges for easy mixing.</li> </ul>	
Mix Ratio by weight	100:14 / Resin: Hardener	
Substrates	Most metals, ceramic, glass and plastics	
Operating Temperature	-60 to 135 °C	

#### **LINCURED PROPERTIES:**

ONCORED I NOI ENTIES.	
Viscosity @ 25 °C, cps	17,500 ±1000
Viscosity @ 25 c, cps	@Temperature 77 °F, 25 °C
Specific Gravity, mixed	2.36
Reactive solids contents, %	100
Pot Life	50 minutes

#### **CURE SCHEDULE:**

1-4 Hours	@ 65°C
24 Hours	@ 25°C

## **CURED PROPERTIES:**

Adhasiya Pand Strangth nsi	2120 ( 1 hr @ 65°C)
Adhesive Bond Strength, psi	2190 (24 hrs @ 25°C)
Hardness Shore D	86 (24 HR @ 25°C)
Hardness, Shore D	90 (1 hr @ 65°C)

## **THERMAL PROPERTIES:**

Glass transition temperature (Tg) 113°C, 235 °F
---

#### **GENERAL INFORMATION:**

For safe handling information on this product, consult the Material Safety Data Sheet, (MSDS).

## **HOW TO USE:**

- 1. Carefully clean and dry all surfaces to be bonded
- Apply AA-BOND FDA26 completely mixed adhesive to the prepared surfaces, and gently press these surfaces together. Contact pressure is adequate for strong, reliable bonds; however, maintain contact until adhesive is completely cured
- Some separation of components is common during shipping and storage. For this reason, it is recommended that the contents of the shipping container be thoroughly mixed prior to use
- 4. Some ingredients in this formulation provided may crystallize when subjected to low temperature storage. A gentle warming cycle of 52°C for 30 minutes prior to mixing components may be necessary. Crystallized epoxy components do not react as well as liquid components and should be re-dissolved prior to use for best results

## **AVAILABILITY:**

This epoxy can be supplied in many different packages.
